

Parking station

Radioshuttle™ Parking Station | Product sheet

The Radioshuttle™ Parking Station has been designed to accommodate shuttles when not in use. Users can simply store them in their own area away from the system.

User friendly and smart ergonomic holder for the battery charger will ensure that batteries are charged during the non-working hours.

Three levels for storing shuttles.
Fits the size and application of your Radioshuttle™-system.

With the in-rack charge option, shuttles in the Parking Station can be charged without removing the batteries.

Works with all different sizes of the shuttle.
